worker

Restart loop · up 9m 10s · 6 OOM kills in 1h

15m 1h 24h · Restart · Stop · Open shell

IMAGE	web-stack-worker:dev · sha256:4f1c9e02a7b3	COMMAND	node dist/worker.js
MEMORY	512 MB limit · no reservation	CPU	2.0 CPUs (NanoCPUs)
ENV	NODE_OPTIONS=--max-old-space-size=768	RESTART	unless-stopped · 6 in last hour
NETWORK	web-stack_default · 172.19.0.6	MOUNTS	./src → /app/src (rw)

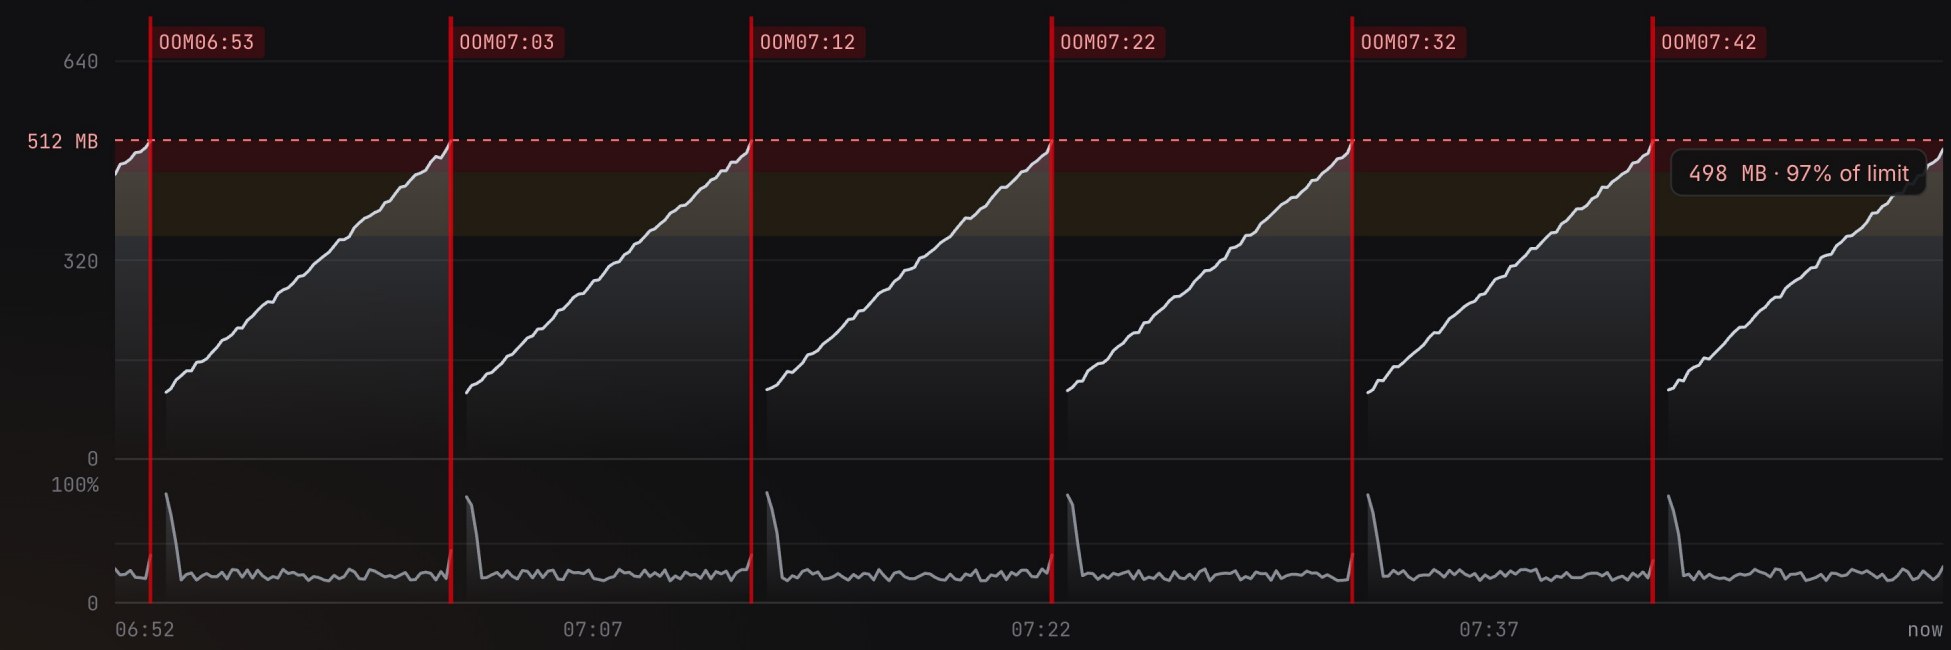

⚠ Heap limit is above the memory limit

NODE_OPTIONS allows a 768 MB heap, but the container is capped at 512 MB. Node won't collect aggressively before the kernel kills it, so every run ends in exit 137.

Lower --max-old-space-size to about 400, or raise mem_limit in compose.yaml.

Memory and CPU, last hour

Memory 498 MB · CPU 31.2% · 70–90% of limit · 90%+ · OOM kill

Events

07:42:50	●	Started · node v20.18.0
07:42:20	●	OOM kill · exit 137 · 511 MB
07:33:00	●	Started
07:32:30	●	OOM kill · exit 137 · 512 MB
07:23:10	●	Started
07:22:40	●	OOM kill · exit 137 · 511 MB
07:13:20	●	Started
